

MOVE SMARTER

Australia's east coast supply chain
alternative offering cost and time
efficient logistics solutions.

WHY CHOOSE

THE PORT OF NEWCASTLE?

CAPABILITY

The Port of Newcastle is one of Australia's largest and most diverse ports. We handle all cargo types, including bulk liquids, project cargo, containers, general cargo, and dry bulk.

As the world's leading coal export port, efficiency is at the heart of our success.

Our supply chain solutions are tailor-made. The team takes a partnership approach, working alongside customers to facilitate shipping, freight forwarding and stevedoring.

Our experience, customer service and attention to detail sets us apart.

We offer:

- **Varying berth options and superior operational infrastructure.** Whether it's in a box, tank, rolling, bulk or oversized, the Port of Newcastle can move it.
- **Control from when your cargo is received at the berth until it arrives at the project site.** Now that's peace of mind for cargo owners.
- **Multiple berth options and service providers,** allowing cargo owners to conduct their own competitive tendering process.
- **Large parcels of competitively priced portside land available for storage and staging.** Take your pick from short term, long term, covered or uncovered storage areas.
- **We're also flexible on the operation of the site,** making life easier for both cargo owners and logistics providers.

CONNECTIVITY

The Port of Newcastle provides a gateway to Australia's largest and most diverse catchment area.

The Port is strategically located halfway between Melbourne and Brisbane and 2 hours drive from Sydney.

Peak hour in Sydney is getting worse. Now is the time to take advantage of the Port of Newcastle's direct and uncongested connections to the national road and rail network.

Import, store and stage cargo at the Port of Newcastle – then truck it via B-double down the M1 at your convenience.

Newcastle is 90 minutes from northern Sydney, with minimal traffic lights from the Port to the end of the M1 in Hornsby.

CAPACITY

Key to the Port of Newcastle's untapped potential is its available capacity.

The Port benefits from ample rail, road, berth, storage and channel capacity with room to expand and grow all trades, including containers.

Skip the capital city congestion and take advantage of the Port of Newcastle's space, service and support.

The Port of Newcastle's capacity includes:

- 200 hectares of vacant port land.
- A shipping channel that can handle more than 10,000 shipping movements per annum – more than double the Port's current trade.
- Direct connections to an uncongested rail network designed for large trade volumes.
- Direct unconstrained access to the national heavy vehicle road network.
