

Mayfield Concept Plan Approval

Quarterly Stormwater Monitoring Report

March - May 2019

In accordance with Schedule 3 Condition 2.21 d of the Mayfield Concept Approval, PON has developed a Stormwater Management Strategy for the site.

To support the strategy PON conducts an ongoing site wide monitoring program to confirm that the site continues to meet the commitments and requirements of the Concept Plan Approval. Sampling is undertaken on a quarterly basis at the downstream extent of the site drainage infrastructure prior to discharge into the Eastern and Western drains. There are a total of six sampling locations, see Figure 1 below:

Figure 1: Mayfield Site Water Quality Monitoring Locations

Analytes that are to be monitored at each sample location are detailed in Table 1 below:

Table 1: Analytes for Stormwater

| Pollutant | Unit of Measure | Frequency Sampling Method | | | |
|------------------------|-----------------|---------------------------|-----------------------------------|--|--|
| Total suspended solids | mg/L | Quarterly | Grab sample during rainfall event | | |
| pН | pH units | Quarterly | Grab sample during rainfall event | | |
| Nitrogen (total) | ug/L | Quarterly | Grab sample during rainfall event | | |
| Oil and grease | mg/L | Quarterly | Grab sample during rainfall event | | |
| Phosphate | ug/L | Quarterly | Grab sample during rainfall event | | |

| BOD | mg/L | Quarterly | Grab sample during rainfall event |
|------------------------------------|------|-----------|-----------------------------------|
| Dissolved oxygen | mg/L | Quarterly | Grab sample during rainfall event |
| Heavy metals (comprehensive suite) | ug/L | Annually | Grab sample during rainfall event |

The last round of stormwater sampling was conducted in September 2018. This round included all of those analytes that are required to be monitored quarterly. There was insufficient rainfall during the first quarter of 2019 to collect any samples for this period.

The comprehensive suites of metals that are required to be monitored annually were also conducted in September 2018.

Results for those analytes to be monitored quarterly are presented Table 2 below:

Table 2: Results for quarterly suite of analytes

| Collection Date | 01.04.19 | | | | | | | | |
|-------------------------------|----------|------|------|------|------|------|------|--|--|
| | Units | ED1 | ED2 | ED3 | WD1 | WD2 | WD3 | | |
| рН | pH unit | 6.99 | 6.74 | 7.01 | 7.03 | 7.03 | 7.17 | | |
| TSS | mg/L | 73 | 63 | 12 | 27 | 27 | 62 | | |
| Dissolved Oxygen | % | 32 | 28.2 | 62 | 46 | 46 | 43 | | |
| Total Nitrogen (calc) | μg/L | 2000 | 2700 | 1100 | 1000 | 1200 | 1600 | | |
| Oil and Grease | mg/L | <5 | <5 | <5 | <5 | <5 | <5 | | |
| Filterable Reactive Phosphate | μg/L | 310 | 80 | 180 | 80 | 110 | 190 | | |
| Biological Oxygen Demand | mg/L | 4 | 2 | 2 | 2 | 3 | 3 | | |
